Glad to help ...

> *Do you have an idea what else could be the reason that prevents me to use a specific contact with gaim?*

Not off the top of my head. I don't have an ICQ account myself, but I do have an AOL IM account (and I think AOL own/run/whatever ICQ now) and I can use that to IM friends on ICQ (and have done many times).

> *Are there base incompatibilities know between gaim and licq?*

I don't know, never having used licq. Could it depend on whether the IM conversations are directed via a server, as opposed to some sort of P2P fashion? I assume that when I IM a friend on ICQ it all takes place via an AOL server.

> *Would you mind if we – after exchanging ICQ UINs by private mail – go on with a test between us, using gaim and licq?*

By all means. I'll email you my IM contact details ...

Best, Darren
