hi all,

does FC2 support NTFS ? i want to access the windows 'D' drive {i can access 'C' using the mount command but not my backup partition D drive} which is currently on another Hard disk using a SATA Intel Motherboard. FC2 is in the old HD. {{ Btw, windows has crashed (not surprising at all) and hence the long route }}

Second problem is that the mozilla browser has also gone kaput and does not load. How do i set it right ? Please be kind as i am quiet new to the \*nix world :-)

thanks for your time,

Kali
