Yep. Do the math. ~1,000 r/w cycles X \$cd-r = BIG SAVINGS. Unless you are burning something for permanent record, the choice is clear. Those CD-Rs sure do make nice coasters, though...

Well *cdrecord* et al can *blank* a CD-RW disk so that you can use it again. That is a very good reason to use CD-RW media.

At the moment UDF formatted discs that can be treated like a hard drive are not supported but I believe support is coming.

Best, Darren
