To: For users of Fedora Core releases <fedora-list@redhat.com>

I got in to the Rescue boot, got everything upgraded
still I have the boot hang on network after it starts it initializing
hardware run
storage I guess is fine
or is it looking for a storage network???

This is Right after I see
Welcome to Fedora Core
Press 'I' to enter interactive startup.
Starting udev: [OK]
Initializing hardware storage network

then blinking cursor

please someone help :(
