Hi all ,

I am using Fedora core 2 (kernel 2.6.11.7) .  
I would like to resize the fedora box partition.  
The partition file system are shown below :

I would to delete /dev/sda2 which is window 2000 OS and copy over remaining size to /dev/sda5 .

Anybody have any ideas how to do that ?

```
Device Boot Start End Blocks Id System
/dev/sda1 1 4 32098+ 12 Compaq diagnostics
/dev/sda2 * 5 1024 8193150 7 HPFS/NTFS
/dev/sda3 1025 1661 5116702+ 83 Linux
/dev/sda4 1662 5530 31077742+ f W95 Ext'd (LBA)
/dev/sda5 1662 2298 5116671 83 Linux
/dev/sda6 2299 2935 5116671 83 Linux
/dev/sda7 2936 3572 5116671 83 Linux
/dev/sda8 3573 3699 1020096 83 Linux
/dev/sda9 3700 5275 12659188+ 83 Linux
/dev/sda10 5276 5402 1020096 83 Linux
/dev/sda11 5403 5529 1020096 82 Linux swap
```
