

Fedora: a2ps problem

a2ps problem

To: fedora <fedora-list@redhat.com>

Since changing from RH9 to FC3, a2ps is misbehaving.
The default behaviour, (-2), gives me virtual pages
with 68 lines and 80 columns apparently without
reducing the font width.
The left pages run into the right,
the right pages run off the page.
Room for 68 lines was apparently achieved
by skimping on the inter-line space.

What's going on?

What can I do about it?
