Hi,

Anyone out there have an A8V MB? The onboard sound sounds really bad to me. It seems like no matter what I do I cannot change the way any playbacks sound.

CD's seem to not have the singers voice as loud as the music. It also sounds like there is some sort of effects setup like in SB live you can change the effects of what you hear.

I can't seem to find the location where I might be able to fix this. All help is appreciated.

Regards

Robert
