hi...

i'm trying to figure out how to install FC3 on a RH8 system with a floppy/harddrive, no cdrom.

i've create the two floppy disk/boot floppies... i get the part where i get the 'boot:' prompt. when i enter 'linux askmethod', the system goes ahead and boots the existing linux/kernel (rh8).

so, what do i need to do to actually kick in the anaconda/fc3 installer to put FC3 on the system...

i'm trying to get to the point where i actually have the FC3 install gui...

thanks

bruce
