

[FC3] squid ftp blocked by selinux

Source: <http://linux.derkeiler.com/Mailing-Lists/Fedora/2005-07/5849.html>

After the last selinux policy update I can no longer use squid to proxy FTP transfers. dmesg shows lots of:

```
audit(1122716171.029:8): avc: denied { name_connect } for pid=2553
comm="squid" dest=21 scontext=user_u:system_r:squid_t
tcontext=system_u:object_r:ftp_port_t tclass=tcp_socket
audit(1122716171.129:9): avc: denied { name_connect } for pid=2553
comm="squid" dest=21 scontext=user_u:system_r:squid_t
tcontext=system_u:object_r:ftp_port_t tclass=tcp_socket
audit(1122716171.229:10): avc: denied { name_connect } for pid=2553
comm="squid" dest=21 scontext=user_u:system_r:squid_t
tcontext=system_u:object_r:ftp_port_t tclass=tcp_socket
```

HTTP transfers still function fine. How can I fix this?

Jurgen
