Hi all,

I'm trying to rip a DVD with dvd::rip.  
The ripping process seems to work fine but when it finishes, a popup saying "transcode can't find this frame." is displayed.

Here is the log :

## Fedora: transcode problem with FC4

```
/media/usbdisk/dvd_ripped/harrisons/vob/003 -c 11-12 -L 19236 &&  
dr_exec convert -size 720x576 /tmp/dvdrip8406.ppm/snapshot*.ppm

&& rm -r /tmp/dvdrip8406.ppm && echo DVD RIP_SUCCESS

Sat Jul 30 15:33:29 2005 Aborting job: Grabbing preview - title #3 ,frame #1259
```

The suggestion given at <http://www.exit1.org/dvdrip/doc/faq.cipp#faq19>  
didn't solve the problem.

I've been using dvd::rip with FC3 without any problem before I upgrade to FC4

```
transcode --version  
transcode v1.0.0 (C) 2001-2003 Thomas Oestreich, 2003-2004 T. Bitterberg
```

thanks for help
