To: For users of Fedora Core releases <fedora-list@redhat.com>

Has anyone seen an RPM for mplayerplug-in on FC4 x86_64? I've been searching all day and no luck. Compiling from source isnt going much better:

```
Source/plugin.cpp: In member function 'virtual NPError
nsPluginInstance::SetWindow(NPWindow*)':
Source/plugin.cpp:593: error: cast from 'void*' to 'unsigned int' loses
precision
Source/plugin.cpp:618: error: cast from 'void*' to 'unsigned int' loses
precision
make: *** [plugin.o] Error 1
```

If anyone has this working on x86_64 FC4 please let me know.
