Should the LABEL be LABEL instead? Or should the LABEL be removed entirely because /dev/hda2 is the device name and not a LABEL?

```
title fc3
root (hd0,2)
kernel /vmlinuz-2.6.9-1.667 ro root=LABEL=/ rhgb quiet
initrd /initrd-2.6.9-1.667.img
```

OR:

```
title fc3
root (hd0,2)
kernel /vmlinuz-2.6.9-1.667 ro root=/dev/hda2 rhgb quiet
initrd /initrd-2.6.9-1.667.img
```

Either version might work vs. the above version.

Fedora: Re: grub.conf emptied, and now i get kernel panic?

Jim

If God hadn't wanted you to be paranoid, He wouldn't have given you such a vivid imagination.
