To: "For users of Fedora Core releases, " <[fedora-list@redhat.com](mailto:fedora-list@redhat.com)>

Further update: Sound is available after all. The proper switch to use is "External Amplifier." Anyone else out there doing the same thing I am, /make sure you select the External Amplifier switch and turn it on/. Only then will you get sound. The test sound will then play flawlessly.

The "smart" update is now complete. That didn't take long--half an hour, forty-five minutes tops. The Inspiron 1200 has a fast processor, and I'm on a Cable network.

Next on the list:

Screensaver

Additional "smart" channels

MADWifi
