

Fedora: mplayer problem

mplayer problem

Latest mplayer from livna installed.

I'm getting the following error from mplayer, which plays the video, but no audio. Xine does the same thing (except I don't see any error messages).

```
Opening audio decoder: [faad] AAC (MPEG2/4 Advanced Audio Coding)
FAAD: Failed to initialize the decoder!
ADecoder init failed :(
ADecoder init failed :(
Cannot find codec for audio format 0xFF.
```

I've got all the codecs from the mplayer website installed and it does play most AAC audio.

Any clues will be appreciated.

Thanks,

John
