I'm trying to get experience with wine so, I decided It will be fine, o have Internet Explorer on Linux.

After to have created the Windows environnement with winetools, I used the command : `WINEDLLOVERRIDES="advpack=n" wine ie6setup.exe` but the download proces stays at 45% and I've to kill the I.E. installation!

Have someone tried to do the same thing?

Tks

Horacio
