Hi, I have been using FC4 for about a month and i like it, but I decided to redo my installation, because of a problem i had, when I used the first disk, it formatted the partition and started installing like i wanted it too, but i little bit into the installation, it made my computer restart. I thought the problem would be a scratch on the disk, but I downloaded the ISO, and burnt it to a cd 3 times and it still does the same thing. does anyone know what is wrong, it worked before, so I don't know what is wrong now.
