My RHN up2date icon has suddenly decided to become a greyed out question mark. It is generating the error:

Error: <ProtocolError for xmlrpc.rhn.redhat.com/APPLET:502 Proxy Error>

I do not run a proxy. I understand that accidentally selecting 'register' when asked may cause the greyed out icon symptom, but I can find no better information than this. If anyone can give assistance, I'd appreciate it!

Steven Stromer
