Josh Coffman <[josh_coffman@at@yahoo.com](mailto:josh_coffman@at.yahoo.com)> writes:

I get libglade errors when attempting to run gweled. It's installed from the repos, so I wasn't expecting any library probs. Also, worked fine in FC4.

I was running the NVidia driver under FC4 and glx working that way. Haven't done anything special for video under FC5.

Anyone know what to do? Link libglade?

Link with `LDFLAGS="-Wl,--export-dynamic"`.

That's #180265: https://bugzilla.redhat.com/bugzilla/show_bug.cgi?id=180265
(Video drivers have nothing to do with this.)
