-

Is anybody else having a problem with kbuildsycoa crashing in FC5? If so, has anybody found a solution?

FWIW here is the BT:

```
[tspd@lemix ~]$ uname -a
Linux lemix.tmcaz.com 2.6.16-1.2122_FC5smp #1 SMP Sun May 21 15:18:32
EDT 2006 i686 i686 i386 GNU/Linux
```

Using host libthread_db library "/lib/libthread_db.so.1".
`shared object read from target memory' has disappeared; keeping its symbols.

[Thread debugging using libthread_db enabled]

[New Thread -1208387072 (LWP 4423)]

[KCrash handler]

```
