FWIW, I'm seeing the same crash on FC5 (x86) (and I had been seeing it in FC4 until switching to the kde-redhat yum repo). I don't have any fresh FC5 installs to get the contents of /etc/xdg/menus from. Can someone possibly tar their's up and send it to me (off list)?

The tar file is on its way to you...

Can you send me the file as well?

Thanks,
James
