Hi,

I have setup a new Fedora 5 Core installation and setup LDAP so that user can authenticate with a Solaris 9 iPlanet LDAP server.

However, each time I log in using SSH or FTP, using the CORRECT ldap password, it will failed.

The SSH always failed with a message like "permission denied, please try again:" error.

The full error is captured below. I have been trying to search the web for resolution but cannot find any. Any help is greatly appreciated.

```
bash-3.00$ ssh -v s39427@sspxz100
OpenSSH_4.2p1, OpenSSL 0.9.7f 22 Mar 2005
