Anyone using epylog and know what I can modify to stop the following from being in my daily logs?

May 31 02:45:38 scrappy kernel: CPU0: Temperature/speed normal  
May 31 02:45:43 scrappy kernel: CPU0: Temperature above threshold  
May 31 02:45:43 scrappy kernel: CPU0: Running in modulated clock mode  
May 31 02:45:48 scrappy kernel: CPU0: Temperature above threshold  
May 31 02:45:48 scrappy kernel: CPU0: Running in modulated clock mode  
May 31 02:45:53 scrappy kernel: CPU0: Temperature/speed normal

I have tried couple different files in /etc/epylog but so far to no avail.

Thanks,
