any pointers to (well-written) courseware for writing device drivers for the 2.6 kernel? i'm interested in courseware that i can license on a per-class or per-student basis, or whatever basis one is willing to discuss. thanks.

rday

p.s. no, you don't get a finder's fee. :-)

p.p.s. the course will be taught on fedora core, so there's the connection.
