The only thing to do is to upgrade the firmware version from 2.4 to 3.0. In the above link the drivers are upgraded, mainly to fix different bug important in the case of the author...

Yes – that was my experience, upgrade to version 3 of the firmware and everything else works. None of the other stuff seems to be necessary.

Ed – you might consider marking the other stuff as probably unnecessary, rather than risk encouraging people to do things they don't need to.

Ed's not the author. I have forwarded this suggestion to him.

Jonathan.
