Sorry for hijacking the thread, but could anyone explain me the concept of encryption of a movie (or any multimedia, in general). I mean, why is that useful?

It's a fruitless attempt to prevent piracy. It does nothing of the sort, in reality.

To clarify a bit, does DVD::Rip unencrypt the .VOB files that are in a movie DVD?

If you have the correct libs installed, it will create an AVI of your DVD.

Home page.

<http://www.exit1.org/dvdrip/>

You can then use any AVI editor to edit the video.
