I use Skype with out .asoundrc or other configuration of dmix!

try skype with out .asoundrc!

In that case, it doesn't work! What is your /etc/asound.conf ?

Do you have set ALSA in the audio option ini skype?

in tools-->options-->sound-devices ALSA (the other option is OSS)

in xmms output plugin is ALSA 1.2.10 (libALSA.so)
device audio is hw 0,0 (options are : default or hw 0,4 this
last not working)

And I have still the same message: dmix: unable to open slave.

```
# more /etc/asound.conf
```

```
#Generated by system-config-soundcard, do not edit by hand
#SWCONF
#DEV 0
defaults.pcm.card 0
defaults.pcm.device 0
defaults.ctl.card 0
```

Mine is:

```
# Generated by system-config-soundcard, do not edit by hand
defaults.pcm.card 0
```

Re: skype

defaults.pcm.card 0

But I have another PC with same /etc/asound.conf as yours, and I'm unable to get xmms and skype at the same time....
