I upgraded my RH9 to FC4 and now FC5. I use Mozilla as a mail and news reader.

The short cut key shift+ctrl+C which marks all mail as read, has not worked since I went to FC4. The other short cuts seem to be fine. For example, my work-around: alt+A to select all, followed by M to mark selected as read, works fine.

Any suggestions?

In Thunderbird (1.5.x) the shortcut to mark all messages read is now just shift-c.

I don't know if that applies to mozilla/seamonkey as well.

No Mozilla/Seamonkey is still shift+control+C
