How can I configure users quota on Fedora 5?
When I trying configuring I receive this message:

```
[root@ias ~]# mount -o remount /ftp
[root@ias ~]# quotacheck -avug
quotacheck: Scanning /dev/hda6 [/ftp] done
quotacheck: Checked 3 directories and 4 files
[root@ias ~]# quotaon -avg
quotaon: using /ftp/quota.group on /dev/hda6 [/ftp]: Processo inexistente
quotaon: Quota format not supported in kernel.
quotaon: using /ftp/quota.user on /dev/hda6 [/ftp]: Processo inexistente
quotaon: Quota format not supported in kernel.
```

What´s wrong?

Packge instaled:
[root@ias ~]# rpm -qa|grep quota
quota-3.13-1.2.2

Thanks

May be quota support is not compiled into the kernel read the below url for the same error

<http://www.howtoforge.com/forums/showthread.php?t=233>

For configuring quota on FC5 read this page

http://www.howtoforge.org/perfect_setup_fedora_core_5_p4
