Around 03:52pm on Tuesday, September 12, 2006 (UK time), Paul Howarth scrawled:

I think what you're looking for is:

```
$ echo hello | Mail -s test john.black@xxxxxxxxxx
```

i.e. replace "sendmail" with "Mail" (note the upper case M).

Mail is soft linked to mail, so the upper case M makes no difference.

Steve

--

A: Because it messes up the order in which people normally read text.

Q: Why is top-posting a bad thing?
