- 

according to this, it's supported:

<http://fedoraproject.org/wiki/Tools/GFS>

Marc wrote:

Is GFS even supported at all on Fedora? I noticed there is no mention of it at all in the Fedora books. I think it requires code that is basically unsupported in the Fedora realm. Can a red hat person clarify this please?

thanks  
Marc

hi

i have some problems installing GFS on a default FC4 installation. here's what i did:

- installed a FC4 "basic" (custom, all package groups deselected = 700mb)
- did a yum update (with default repository confs)

after this i tried the following:

```
[root@c1 yum.repos.d]# yum install GFS-kernheaders GFS-kernel
gnbd-kernel
GFS
lvm2-cluster cman-kernel cman-kernheaders cman ccs ccs-devel fence
dlm-kernel
dlm-kernheaders dlm dlm-devel magma-plugins
```

dlm-kernel
[root@c1 yum.repos.d]#
```

if seems that the kernel rpm (1833\_FC4) cannot be found anywhere. is  
there  
some  
other (simple) way to install GFS?

thx in advance.
