

Problems installing the kernel-devel package with Yum (FC 5)

Source: <http://linux.derkeiler.com/Mailing-Lists/Fedora/2006-09/msg03558.html>

-

I need to install the kernel-devel with Yum.
But this is what I've got:

```
[root localhost bdesoete]# yum install kernel-devel
Loading "installonlyn" plugin
Setting up Install Process
Setting up repositories
core [1/3]
Cannot find a valid baseurl for repo: core
Error: Cannot find a valid baseurl for repo: core
[root localhost bdesoete]#
```

What does it means and what can I do about it?
Kind regards
