Hi, for some time I haven't managed to get Skype to work under FC5. On another partition I've installed FC6 and also no success. Yet on another partition I've got Ubuntu installed and there Skype worked out of the box. I've setup everything in gnome-volume-control exactly the same as it is in Ubuntu, but still it isn't working :(

Of course in both setups I us ALSA.

I've attached the output of amixer.

I would be very thankful for suggestions!

Przemek
