I have a text file with more than 300000 of lines like the following:

```
1 E E E
2 C D
3 B E D
4 C E D
5 D E
```

I am looking for an automatic way of transforming my text file into another one with the format

```
1 E
1 E
1 E
2 C
2 C
3 B
3 B
3 D
4 C
4 C
4 D
5 E
```

Any ideas?

Thanks in advance,

Something seems funky there. The desired output doesn't match the input data. Can you describe in a general way what it is you are trying to do?
