Hi,
I cannot get Gaim to work with Google Talk. A normal Jabber account works fine, but whenever I tried to sent a message (to myself for example), there is a pop up with the information:
Jabber Message Error
Message delivery to gmilmei@xxxxxxxxxx failed: (Code 503)
However, the login seems to have proceeded correctly, since my account appears in the buddy list with full information.
I also tried with Gossip, but that doesn't work either.
The account also doesn't seem to work on my Nokia N800.

Does this help you?
<http://www.google.com/support/talk/bin/answer.py?answer=24073> I have used this method to use Google Talk on Gaim for a while now without any problems.

Yes I followed these instructions. However in the Fedora gaim, there is no option for TLS.
