Doing a netstat -pltn gives me:

Re: httpd driving me crazy.

```
LISTEN 1905/python
tcp 0 0 :::6002 :::*
LISTEN 2096/Xvnc
tcp 0 0 :::22 :::*
LISTEN 1932/sshd
tcp 0 0 :::1:6010 :::*
LISTEN 3923/1
```

Which shows nothing Listening on port 80. One again FC6 has done me in.
Any explanations?

Try "netstat -pan | grep :80". You may be running something like "xmms"
which will USE port 80, but it's not a process LISTENING on port 80.
Your check was limited to things listening on port 80.
