

[OT] Saving file as blob in PostgreSQL

Source: <http://linux.derkeiler.com/Mailing-Lists/Fedora/2007-06/msg06309.html>

Has anyone written code to save files in PostgreSQL in a BLOB field? I can't seem to get it to play with my file... I created a new column named resultsArchive of type "bytea" and psql won't play nice:

```
data=> update tblTests set resultsArchive=lo_import('/temp/stuff.txt') where idTest = 161;
ERROR: column "resultsarchive" of relation "tbltests" does not exist
LINE 1: update tblTests set resultsArchive=lo_import('/temp/stuff...
```

I've googled for examples and I see nothing that would make me think this is not correct. Useful help would be greatly appreciated.
