Jeff,

You must supply the path to the command to succeed:
yum whatprovides /usr/lib/bcc/include/stddef.h

dev86-0.16.17-2.2

Regards

I tried using the command "yum whatprovides
stddef.h" to locate the
include library last night. Yum when through its
process and came up
with nothing in a fairly short order.

Am I not using the command correctly?

Jeff
