Is there an app that will convert MP3 files to Ogg?

This won't help if you're a Gnome user, but there's a Konqueror plugin at kde-apps.org called AudioKonverter which does music file conversions; I use it to do MP3 to Ogg conversions and Ogg to MP3 conversions. I wanted to package it up for Fedora, but it relies on programs that aren't allowed in the main repository (like LAME).

Thanks for the reply and the heads-up. You are correct though, I am a Gnome user. I used KDE early on in my FreeBSD days...

Funny how I actually started using Gnome as my first WM, KDE after, then spend a heck of a lot of time using XFC4.

Since moving from FreeBSD (and a nice gradual move to Linux via Ubuntu) I have pretty much come full circle under FC with Gnome

Sigh I digress, sorry.
