My experience is that it takes about a week for a new domain name to make it's way across the world. If it has been less than a week just relax and it will happen.

Karl

Hello, Karl

So, you are saying that even though <http://www.afolkey2.net> is now accessible by it's domain name, that different, oh let's say "functions" of my domain will take different amounts of time to become

Re: New issues with Sending email: related to Domain name transfer?

useable again? If that is so, that's cool. I'm just asking because I honestly want to know. I must restate, though, that the thing that confuses me is how my registrar, in two different locations, shows two different sets of nameservers. But again, this might all just be a waiting game.

Thank you for your attention,
Steven P. Ulrick

P.S.: I had forgotten that I had used the name of our dear deceased cat, Linus (pronounced Lee-nus) in the account settings on this email account. Like my wife just said, his memory lives on :)
