I've been using LVM on one computer for some time,
without any real problems.

However, I've decided that it causes unnecessary complications,
as some applications do not seem to accept the LVM devices,

parted and parted front ends.
Anyone lese?

while I don't find any real advantages to compensate.

... Depends on what you need.
I regularly move free space between different partition.
Having to do it without lvm is a major pain in the back.

I thought it would simplify changing the sizes of partitions,
but as it happens I never need to do this
with today's enormous disks.

OK. As I said before, it greatly depends on what you do with you
machine.

I wonder if that is the general experience?
