Hi,

I'm stuck with some 32bit only drivers. I have F7 64bit installed and they can't be used (of course).

These drivers probably won't be available anytime soon I think in 64bit version but it's being worked on so eventually they will be available I think. Until that time I'd like to work with the 32bit drivers.

Besides installing a complete f7 32bit version are there any other options to use these (closed source) drivers ?

Regards,
Marcel
