

How to configure GRUB to boot from CD-ROM?

Source: <http://linux.derkeiler.com/Mailing-Lists/Fedora/2007-08/msg03070.html>

-

I would like to include an entry in my GRUB menu to let it boot from CD-ROM. To make it clear: I do not want to install GRUB on CD-ROM. I want a menu entry pointing to CD-ROM in my locally installed GRUB.

Is such configuration possible? And if it is, how does it look like?

I tried

```
title CD-ROM
rootnoverify (hd2)
chainloader +1
```

But it does not work. Searching the net resulted in many explanations how to make bootable CD-ROM, but that's not what I'm looking for.

--

bye,
Adalbert

An Ada exception is when a routine gets in trouble and says 'Beam me up, Scotty'.
