Hi Adel and all,

I misunderstanding it not recognized that wifi card with mini-PCI.

I think that Rudolf's way is collect but kwifi will be still working.

Subject: Re: wifi manager

```
open a terminal
su -
service NetworkManager start
```

```
## then actually an applet should appear on the right upper spot and
if it works proceed with:
```

```
chkconfig NetworkManager on
```

```
## if you have any problems actually get back to me by replying to the list.
```

kind regards,
Rudolf Kastl

Hi all
I have recently installed F8. I haven't find the gnome wifi maanger not
the kwifimanager of kde. however, the system recognise my wifi card
((intel 3945BG ).
What should I do please
Regards
```
