I installed F8.
I updated F8 (yum update)
I removed sendmail (yum remove sendmail).
I installed postfix (yum install postfix).
I installed dovecot (yum install dovecot).
I installed fetchmail (yum install fetchmail).
I installed samba (yum install samba).
I installed dhcp (yum install dhcp).
If I shutdown and restart (shutdown -r now) the messages are regular (all OK).
If I shutdown (shutdown -h now) I receive this message:
"Start killall: Stop postfix [Failed]
[Failed] "

Can you help me?

chkconfig --add postfix
chkconfig --levels 2345 postfix on

Craig
