david walcroft wrote:

How do I pull this type of message out and place into a directory [bpalogin]

```
Dec 19 09:12:58 reddwarf bpalogin[1965]: Error binding auth socket - Bad file descriptor
Dec 19 09:12:58 reddwarf bpalogin[1965]: Sleeping for 60 seconds
Dec 19 09:42:59 reddwarf bpalogin[1965]: Auth host = sm-server.qld.bigpond.net.au:5050
Dec 19 09:42:59 reddwarf bpalogin[1965]: Listening on port 5050
```

I get a lot of these they fill up 'messages'.

Why not discover the source of the problem and fix it. You really shouldn't be getting disconnected that often (I think that's what's happening, I don't think you published enough messages).

I was connected continuously from Nov 27 to a power failure yesterday. Not to Telstra though.

It might be worth asking for comments at <http://forums.whirlpool.net.au/forum-threads.cfm?f=14>

Seems there's unhappy campers there.

Cheers
John
