Does anyone know where I can get a package with the pptp plugin for network manager for FC7?

Or some good instructions for configuring a pptp client connection manually?

I did use pptpconfig from the pptp-client project at sourceforge in the past, is it still the one to use?

I am using pptpconfig on F8, but I did use it on F7 too. You can install pptpconfig on F7 with yum. Have a look at

<http://pptpclient.sourceforge.net/>
