

F8 rescued fails on FC7?

Source: <http://linux.derkeiler.com/Mailing-Lists/Fedora/2008-01/msg04731.html>

On my dual boot laptop with WinXP and F7, if I try to start from the F7 rescued, it appears to run properly. However, with an eye toward installing F8, if I boot from the F8 rescued, it hangs after printing the line:

```
running /sbin/loader
```

The downloaded rescued iso passed sha1sum, and I tried it with two different burned disks.

!!Now while typing this, perhaps five minutes later, it suddenly started correctly!

So what took so long?

Thanks,
Mike.
