Around about 05/05/06 12:16, Vincente Aggrippino typed ...

Are there any utilities that would allow me to interact with Gnome, GTK, or the Metacity window manager from a shell script?

wmctrl is useful for this (shell control of windows, as opposed to devilspie's startup control).

---

```
[neil@fnx ~]# rm -f .signature
[neil@fnx ~]# ls -l .signature
ls: .signature: No such file or directory
[neil@fnx ~]# exit
```
