I just upgraded my Ubuntu Dapper amd64 to Edgy amd64. Previously in any application I could type Ctrl+Shift plus a hex code and it would type the Unicode character for that hex code. E.g., to get a schwa, type Ctrl+Shift+1DD.

Since upgrading to Edgy this no longer works in any application. I am a student of linguistics and I really need this capability. What happened, and how can I fix it?

Same thing happened to me! The new method is:

<alt>+<control>+u<code>

Daniel
