Alternatively , you can remove all thumbnails

```
$ rm -rf ~/.thumbnails
```

Maybe a 'touch' of the file is enough?

I vaguely remember, someone did mention on planet gnome (i believe) about a utility to remove only invalid thumbnails . Check on gnomefiles.org , it might help , though not sure.

Yes, the url is <http://blogs.gnome.org/view/gpoo/2006/08/30/0>
